**Transfer your data quickly
and easily from your PC to
your new Apple Mac**

**Converts all your Outlook
emails to Apple Mail**

Move2Mac is a software solution that lets you easily move information from your PC to the Mac, saving you from the tedious process and frustrations of doing it manually. Move2Mac lets you quickly and easily transfer music, photos, files, folders, and more. But, Move2Mac does more than just move data files. It also moves important settings like Internet Explorer favorites and backgrounds, as well as move and convert your e-mail messages, address book and calendar for Outlook on the PC to Mac's Apple Mail. With Move2Mac, you'll be productive right from the start!

Saves You Time and Money

Moving to your new Mac on your own will take hours at best (if you're already an expert!), probably days. 3rd party services are expensive, limited and you have to make an appointment and drag BOTH computers and all discs, peripherals etc to the store. In comparison, Move2Mac is very fast, very simple, much cheaper and you can use it when and where it suits you.

Lets You Choose

Select the music, photos, files and folders to move, so your new Mac isn't cluttered with unwanted files.

Eliminates the Hassles.

Transferring data to a new computer can be tricky. Move2Mac does it safely completely, and securely, freeing you from any hassles.

Fantastic Support

Orlogix offer free unlimited Email and Phone support and a European FreePhone number. Our expert in-house technical support team includes native language speakers in English, French, German, Italian, Spanish, Czech and Polish.
